Report of Chief Engineer of Fire Department

To the Selectmen and Voters of the Town of Milton:

In rendering my report of the Fire Department for the year ending January 1, 1938, I would state that we were very fortunate in having only one bad fire during the year, which was in the A. O. U. W. block.

This department has responded to fourteen chimney fires, one tar fire, two automobiles, three grass fires, and two where buildings were involved. The amount of property involved in fires is as follows:

Value of buildings,	$8,000 00
Insurance on same,	5,000 00
Losses paid,	2,351 75
Value of contents,	1,000 00
Insurance on contents,	1,000 00
Losses paid,	900 00

I recommend that an inhalator be purchased for use of the Fire Department as on two occasions we had to ask aid from Rochester for the use of theirs, and in a time like this minutes are very valuable. In behalf of the department I am glad to take this opportunity to thank the Selectmen and all who have cooperated so willingly in the past year.

Respectfully submitted,

CHARLES W. WILSON,
Acting Chief.

Report of the Commissioners of Milton Fire District

To the Selectmen and Voters of Milton:

The fiscal year ending January 31, 1938, covers the first year of operation of the new water supply system. The financial results of the year's operation are shown in the report of the treasurer of the District. The operation of the system resulted in a net profit of $411.85 as shown by the income statement. There was a net profit of $411.27 in the preceding year ending January 31, 1937. This means that since the system started operation there has been $823.12 added to the Profit and Loss account. This has occurred because of the fact that income from the yearly appropriations for hydrant rental, precinct tax and commercial sale of water has exceeded the cost of operating the system.

The P. W. A. project construction work was completed and all accounts connected therewith have been closed.

New construction independent of the P. W. A. has been carried out during the year due to the application for new services. During the past fiscal year 23 new service connections have been made at a cost of $810.39. One new meter was installed at a cost of $12.00. A 368-foot extension of the six-inch main was made on the Farmington Road, and one additional hydrant set, at a cost of $657.05. The contractor on the P. W. A. project left one extra hydrant as a spare and this was used for the Farmington Road job. The total cost of this new construction totals $1,479.44 and was paid for partly by using the profit from operations mentioned in the first paragraph and partly by raising $800.00 on notes to the Farmington National Bank. This new construction, costing $1,479.44, will result in increased revenue of $271.44 or an average of $11.80 per serv-

ice based on the actual specified rates in the applications. The cost of supplying the extra water and collecting the water rents will be approximately $44.60 based on the average costs for the whole system. This leaves a net income of $226.84 which is a return of about 15 per cent on the investment. The Commissioners believe it to be good business judgment to install services just as rapidly as possible whenever applications are made if the prospective income will show a fair return on the investment. In this matter of service extensions there are undoubtedly some individual services the cost of which was higher than the prospective income would justify. In considering such cases the Commissioners have acted on the principle that as long as the whole group shows a good average return the high cost individual services should be installed. Such installations are an asset to the general health of the District and will probably result in indirect savings in doctor's bills and possibly in relief expenses.

In the coming year there will probably be a few more applications for services but probably not so many as last year. It is recommended that if applications are received that they be installed. The cost of such installations would undoubtedly have to be paid for by raising money on short term notes. Such notes could be paid off in one year or spread over a period of several years. The latter course would avoid the necessity for an extra high precinct tax in any one year.

In the coming year it will be necessary to redeem the first $1,500.00 of the District's bond issue. In order to cover this payment the Commissioners have inserted an article in the District's warrant to see what amount the District will raise for this purpose.

It will be necessary to pay the interest on the bond issue and the running expenses of the District during

the coming year. These expenses have been estimated as shown in the following budget:

Income:	
Sale of water,	$1,500 00
Precinct tax,	1,500 00
Hydrant rental,	500 00
	$3,500 00
Expense:	
Bond retirement,	$1,500 00
Bond interest,	1,350 00
Labor, running pumps and collecting water bills,	150 00
Electric power,	200 00
Pumping station supplies,	50 00
Commissioners' expenses,	100 00
General expenses,	50 00
Payment on notes,	100 00
	$3,500 00

The Commissioners wish to thank all those who have assisted them in any way during the past year.

Respectfully submitted,

THOMAS J. McGRATH,
FRANK B. McINTIRE,
STANLEY C. TANNER,
Commissioners.

Financial Report of the Milton Fire District

To the Commissioners and Voters of Milton Fire District:

The Legislature of the State of New Hampshire, by Section 1 of Chapter 153 of the Session Laws of 1935, has provided as follows:

"Any city, town, or village district owning, operating or managing any plant or equipment, or any part of the same, for the manufacture or furnishing of light, heat, power, or water for the public, or engaged in the generation, transmission, or sale of electricity or gas ultimately sold to the public, shall be subject to all of the provisions of the Public Laws of New Hampshire set forth in Chapter 240, Sections 7 through 18, inclusive."

Sections 7 through 18 of Chapter 240 of the Public Laws referred to above authorize the Public Service Commission of the State of New Hampshire to establish a system of accounts for public utilities operating within this State and to require the submission of periodic reports setting forth such statistics and facts as may be required by the Commission.

Acting in accordance with the above mentioned law the Public Service Commission issued its Order No. 3013 as follows:

"Ordered, pursuant to Section 1, Chapter 153, Laws of 1935, that municipal electric and water utilities shall keep systems of accounts and records and make reports to this Commission as prescribed and set forth in the pamphlets entitled 'Regulations for Keeping of Accounts and Filing of Annual Reports by Municipal Water Systems, effective January 1,

1936,' which pamphlets are hereby made a part of this order, and it is further ordered that said regulations shall become effective as of January 1, 1936.

By order of the Public Service Commission of New Hampshire this seventeenth day of February, 1936.

JAMES W. DOON,
Secretary."

The Milton Fire District has been notified by the Public Service Commission that having commenced to engage in the supplying of water it becomes subject to the above-mentioned regulations. The Commission has furnished us with their book of Uniform Classification of Accounts for Water Utilities and with blank forms upon which to make reports.

These accounting regulations specify in great detail exactly how the accounts shall be kept. They specify that accounts shall be kept by the double entry method of bookkeeping. The accounts are similar to those kept by all large business organizations and are designed to accurately show the financial condition of the District.

The Milton Fire District also is required to make annual reports to the State Tax Commission. These reports are similar to but not exactly like the reports required by the Public Service Commission. The Public Service Commission reports are on an accrual basis and the Tax Commission reports are on a cash basis. Each Commission has its own form of report and while they mean the same in the end, it is difficult to compare one with the other without doing considerable rearranging of the accounts.

The financial reports to each Commission are shown in the following tables. It will be noted that in the Public Service Commission Income Statement only the financial results due to the actual operation of the water system are shown. Items that apply to

new construction are carried in the balance sheet and do not show up in their Income Statement. The Tax Commission Income Statement shows the total receipts and payments covering both operating and new construction.

The item "Municipal Investment" represents the amount of money the District has actually put into its property, starting with the inventory shown on the books January 31, 1933.

The details are as follows:

MUNICIPAL INVESTMENT

Property owned January 31, 1933:	
Precinct building,	$1,500 00
General equipment,	330 00
Cash,	40 04
Appropriation for water project made in 1934,	500 00
Received from P. W. A.,	29,249 24
Accrued interest on bonds,	153 75
	$31,773 03

In addition to the above items, the District has issued $36,000.00 in bonds. As these are paid off each payment will be credited to Municipal Investment, eventually resulting in retiring the bonds and increasing Municipal Investment by that amount.

Respectfully submitted,

HARLAN M. BRYANT,
Treasurer.

SUPERINTENDENT'S REPORT

To the Milton School Board and Citizens:

This is the fourth annual report which I have had the honor to make. The usual statistics are for the year ending June 30, 1937.

The only change in teachers since the last report is at Milton Mills. Three rooms have been consolidated into two, and Mrs. Manora Clayton released because of illness. The School Board has saved expenses for the District by combining transportation routes wherever possible. The enrollment of pupils in the town, as a whole, is about the same, 208, exclusive of the Nute High School. These figures compare with 223 for last year and 195 for 1935-36. Before the end of the year the total attendance will probably exceed that of 1936-37. Nute High School has registered 76. The increase here has been largely in tuition pupils. I call your attention to the report of the Headmaster.

We are carrying on the same testing program this year. In October the Detroit First Grade Intelligence Test was given to the beginning pupils and the Otis Group Intelligence Test to the eighth grade. The Metropolitan Achievement Tests are given in the middle of the year in grades 4, 5, 6, 7, and 8, and the Standard Graduation Tests will be given to the eighth grade in June. The Achievement Tests of last year gave satisfactory results in everything except Vocabulary. Our pupils need to do more reading of good literature, outside as well as inside school.

It gives me great pleasure to announce that the Woman's Club is furnishing free milk, 25 bottles a day, to the undernourished pupils at Milton Village and as many more bottles are being purchased by parents.

Last June the Oscar Moorehouse Post, American Legion medals were awarded to Maurice Fletcher of Milton Mills and Emily Casey of Milton. Miss Casey

also received the highest mark of any pupil in my Union in the Standard Graduation Tests.

During the summer septic tanks were installed at the Nute Ridge School and they are giving good satisfaction. No longer do the pupils have to go to outside toilets in all kinds of weather. When this building has been painted inside and out it will be a very acceptable rural school. We continue to transport the pupils of grade eight to the Village. The attendance record for the District is very commendable and the tardy marks have still further decreased.

REPORT OF STATISTICS FROM SEPTEMBER, 1936 TO JUNE 30, 1937

* Includes those made by bus pupils.

Pupils in Elementary Schools transported 88

Number teacher visits of Superintendent (not including Nute High) 274

Number visits of citizens 286

Nute High School is being conducted in a very satisfactory manner. A survey of the building has been made as to its adaptability for the Mechanic and Domestic Arts. It is found that these courses could be introduced without making expensive alterations or additions. All that we need is money. As the District well knows, the invested funds of this school are not sufficient to carry on the school as now organized. Your trustees are asking for an enlarged appropriation.

The School Board has given thoughtful consideration to the needs of all schools and has tried to see that the District received a dollar's return for every dollar invested. We appreciate their support and consideration.

Respectfully submitted,

HOWARD L. WINSLOW,
Superintendent, Union No. 56*.

REPORT OF THE HEADMASTER OF NUTE HIGH SCHOOL

To the Superintendent of Schools and the Members of the Board of Trustees:

I hereby submit my second annual report of the Nute High School which opened its forty-seventh year on September 7th with an enrollment of 74 pupils. Transfers and withdrawals have reduced the registration until at present there are 69 pupils divided as follows: Post Graduates, 2; Seniors, 12; Juniors, 9; Sophomores, 19; Freshmen, 27.

Three new subjects have been added to the curriculum. They are: Trigonometry, Solid Geometry and Plane Geometry. We have continued the use of our "Activities Period" which is used for the various class and school extra-curricular activities as well as for the teaching of the fundamentals. We feel that the time spent in teaching the fundamentals has been a big help to our pupils. This is partially shown by the results of a series of tests in fundamentals given to members of the senior classes in all the high schools of the state, during the spring of 1937, by the State Department of Education. Our school was above the state median in all of these tests as well as being state high in one.

New equipment which has been purchased this year includes the following: A complete set of apparatus for the physics laboratory, one Underwood typewriter for the commercial department and five new desks for the English room. New text books were purchased for the following courses: Physics, History of Civilization, English I, English II, French I, French II and Plane Geometry.

Members of the school have been weighed and had a thorough examination of the ears, eyes, throat and nose by our school nurse, Miss Marion Northway, R. N.

The attendance has been excellent, the average attendance to date being better than 95 per cent.

Much effort has been devoted this year to the organization of extra-curricular activities. To date we have made arrangements for the organization of the following activities: Grammar School Boys' Basketball, Grammar School Girls' Basketball, Boy Scouts' Basketball, High School Class Basketball, Glee Club and Radio Club. It is expected that still other activities will be organized before the end of the school year. We feel that these activities will be a real benefit to the young people in this community in as much as they make opportunity for profitable and desirable use of leisure time.

The many helpful suggestions of our Superintendent have been beneficial to the school and staff.

Respectfully submitted,

AUSTIN L. HOWARD.

February 19, 1938. Headmaster.
